

PRODUCTION

2021 feels like it went by so fast. Running church throughout the pandemic has definitely had its challenges. From being online one week, in person the next and then outdoors there is always a lot to do.

With running church outdoors, we had to create a system that would make outside more useable for our worship teams and running Sundays services, along with having the ability to be set up the morning of. This summer we dug trenches for power and cabling. We built a mobile stage. Created multiple mobile studios in and around the church.

This year in production we have taken some good steps forward. We have been able to upgrade our live stream quality from going to 720-2.8k resolution and really focused on our camera work and consistency for production to run smooth. We continue to grow our teams and are focusing on developing our teams and skills.

One of our focuses has been our YouTube Channel and producing content for that. We filmed and released music videos throughout the year along with each Sunday service. We have gained almost 500 subscribers from people in our church and outside our church that tune in weekly for our services online.

Running production is far from a one man job. We have so many different streams of production and have great people serving in all of them. From sound technicians, video directors, camera ops, lighting operators, editors, etc...

We are so blessed to have people willing to use their gifts and talents to serve in this area. Thank you to all my teams for the constant support and for week after week showing up so we can do our best to make Sundays possible both in person and online. I look forward to growing and learning with you all as we continue to hone our skills!

Respectfully Submitted,
Chase Godmere
Technical Director
